### Planted in 1978; with our first 'legal' vintage in 1983– we make food-friendly wines that can enhance any meal without breaking the bank and a line of reserve wines to enjoy on special occasions (like Tuesdays).

We grow our own grapes from our five estate vineyards, maintained without the use of irrigation, harsh chemicals or pesticides. We've earned both 'Salmon Safe' and 'LIVE' awards for our sustainability.

Open weekends - Friday, Saturday & Sunday 12-5pm.

# We make Great Wines and have a good time doing it! <u>Join us for events including-</u>

Spring ~ Barrel Tasting & St Josef's Day
Summer Time ~ Food & Music on Sundays
Cheeseburger in Paradise Party + OysterFest
Fall ~ Grapestomping Festival
Winemaker's Dinners

### Did you know?

Owner/Winemaker Josef was born in Hungary and grew up in Southern Germany. Lilli was born in Odessa Ukraine and grew up in East Germany. *They met in the German city of Chicago.* 

## Josef's Grandfather had a winery in Hungary.

A baker by trade; they established and ran artisan bakeries in Lake Oswego & Canby while putting together a farm & vineyard on the side.

# The winery building was originally a cow barn!

Lots of hands-on work went into the remodel including Lilli's father making the tables for the Wine Stube and Fest Halle.

# The family hand-planted the vineyards in 1978-

This was before GPS - that's why the rows look a little crooked...:) At the time there were less than 25 vineyards in all of Oregon, now there are over 600 wineries.

# Join in the NW's Original Grapestomping in September! complete with German Music & Stomping in 1000 gallon barrel

#### We have 6 landscaping goats and 2 llamas-

and you can say hello to them at the pond. Enjoy our winery scavenger hunt/tour for free- ask a host for one .

#### Our Grapes, Our Wines.... Estate Grown

We grow, make and bottle everything right here. With 5 vineyards and our own bottling line and champagne system. We sell half of our fruit to other wineries. All of the fruit is our own, except the Cab and Merlot which needs a hotter climate.
